IMPORTANT SAFETY WARNINGS AND INSTRUCTIONS READ PRIOR TO USING GALCO PRODUCTS

▲ DANGER

Firearms users must understand and obey the Rules of Firearms Safety:

- 1. All firearms are always loaded.**
- 2. Never let the muzzle cover anything you're not willing to destroy.**
- 3. Keep your finger off the trigger until your sights are on target.**
- 4. Be sure of your target and what's beyond.**

▲ WARNING Failure to heed these warnings or follow the operating instructions may result in negligent discharge of a firearm, causing serious injury or death.

Read and understand all owner's manuals, instructions, and guides prepared by the manufacturer of your firearm prior to use.

Galco holsters are designed to carry specific firearms.

▲ WARNING If the firearm is not properly secured by means of friction or the retention device(s), it could become dislodged, causing injury and possibly death to the user and others.

▲ WARNING Never holster a firearm in the single-action mode, unless it is a semi-automatic pistol and holster designed and intended for "cocked and locked" or "Condition One" carry.

▲ WARNING Always ensure that a single-action pistol has the manual safety engaged when carrying in a holster.

▲ WARNING Do not attempt to cock a holstered firearm, as this may damage the firearm, the holster, or both, and may contribute to a negligent discharge.

▲ CAUTION Always protect an exposed magazine release from accidental activation.

CARRY CONDITION OF THE FIREARM

▲ WARNING Some single-action revolvers and some semi-automatic pistols must be carried with the hammer or firing pin resting on an empty chamber.

Carrying any firearm with a live cartridge in the chamber immediately in front of the firing pin may cause a negligent discharge. Information regarding the safe carry condition of your firearm will be contained in the product information manual provided by the firearm's manufacturer. If you are unsure of the safe carry condition(s) of your firearm, contact the firearm's manufacturer.

▲ WARNING Galco holsters with retention straps intended for single-action pistols (such as the 1911) are designed for "hammer down, empty chamber" carry, unless otherwise specified. Galco holsters without retention straps ("open top") are designed to carry single-action pistols in all safe conditions of carry as specified by the firearm manufacturer.

PRODUCT INFORMATION GUIDE

LEATHER HOLSTERS AND ACCESSORIES

GalcoGunleather.com
 2019 West Quail Avenue Phoenix Arizona 85027

▲ WARNING Before use, be sure the holster selected is designed and intended to carry your particular firearm.

If you have any questions about correct fit, contact Galco Customer Service at 800-874-2526 or customerservice@galcoGUNleather.com. You may also visit GalcoGunleather.com and use our online fitting guide.

▲ WARNING Carrying a firearm in an ill-fitting or improper holster can result in serious injury or death. The purchase and use of a Galco holster is at the sole and exclusive risk of the user.

READ AND UNDERSTAND THIS ENTIRE GUIDE PRIOR TO USING THIS PRODUCT.

Firearms are inherently dangerous. Improper or careless use of a firearm or firearm and holster may result in serious injury or death. It is the user's responsibility to possess a thorough knowledge of, and be properly trained in, all aspects of firearm use, including holster use and safety.

▲ WARNING When drawing a firearm or replacing it in the holster, DO NOT place your finger on the trigger, in the trigger guard, or near the trigger. Position your finger along the frame of the firearm above the trigger guard. Keep your finger off the trigger until your sights are on target.

NOTICE When placing the firearm into the holster, always place your thumb over the hammer or behind the slide. This will enable you to feel if the hammer starts to move rearward, or the slide begins to come out of battery.

▲ WARNING
**IF A FIREARM FALLS OUT OF ITS
 HOLSTER, IT MAY FIRE, CAUSING
 DEATH OR SERIOUS INJURY.**

Always place your hand on the firearm and holster when running or performing other physically vigorous activities.

It is the user's responsibility to maintain the holster by regularly checking component parts for excessive wear and proper function. This includes, but is not limited to, tension units, snap closures, and retention devices.

SAFETY SYMBOL DEFINITIONS

▲ DANGER

Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

▲ WARNING

Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

▲ CAUTION

Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury

NOTICE

Used to address practices unrelated to potential personal injury.

▲ CAUTION Do not place a loaded firearm in a holster without first testing – with a firearm double-checked and verified to be unloaded – for proper firearm fit.

▲ CAUTION Tension units are not pre-set at the factory. If a holster has tension units, it is the user's responsibility to ensure they are appropriately adjusted to properly retain the firearm.

Carry the firearm in the safe condition recommended by its manufacturer. This information will be contained in the product information manual provided by the firearm manufacturer. If you do not have the manual applicable to the firearm, contact the firearm's manufacturer.

Always ensure the firearm is fully seated in the holster, and that it activates all automatic or manual retention devices (when provided). Retention devices must be used when provided.

Checking tension units each time the holster is used is required as part of your regular safety inspection. Applying a small amount of clear nail polish to the threads of the tension units, after proper adjustment, will help minimize screw loosening.

DO NOT USE CUSTOMIZED, MODIFIED, WORN OR BROKEN FIREARMS.

Do not use customized, modified, worn or broken firearms, or those otherwise outside the original manufacturer's specifications, in a Galco holster.

Do not in any way modify, disassemble, or remove any part from this holster, except as approved and recommended in Galco's Product Information Guide.

Do not expose your holster to extreme heat, such as the interior of a car in summer, or leave it otherwise exposed to the elements.

Do not rely on any holster being "snatch proof" regardless of the number of retention devices it may feature. Rely only on proper training and situational awareness.

INSPECTIONS/MAINTENANCE, ADDITIONAL USER RESPONSIBILITIES, AND LABELING

It is important to understand that all products, including firearms and holsters, may eventually "wear out" or become unsuitable for the function for which they were designed. Stress and strain placed on a product will vary according to frequency and conditions of use, and therefore it is difficult to indicate a recommended replacement date for this product.

▲ WARNING It is the user's responsibility to ensure that the item remains serviceable and safe, and able to continue service within its design intent.

NOTICE It is the user's responsibility to inspect the holster before and after each use for signs of excessive wear or loss of retention capability, and appropriate tightness of all hardware.

CONGRATULATIONS ON YOUR PURCHASE OF A GALCO LEATHER PRODUCT!

We appreciate your business.

Our saddle leather products are made from natural steer hides that are range bred and grown. Therefore, there may be natural range markings in the grain of the saddle leather. This is normal for top grain steer hide and adds to the beauty and character of your Galco leather product. These same natural range markings will appear in our genuine horsehide.

Premium Center Cut Steerhide™ is steerhide with the outer and inner layer removed. It has been treated at the tannery in such a way as to retain its natural lateral strength and, at the same time, provide a soft inner layer to protect the firearm's finish. It also has an outer layer finish that is ideal for inside the waistband and pocket holsters due to its natural “grabbing” ability. Center Cut Steerhide works equally well for general holster designs because its exterior does not show scuffing or scratches. Galco's saddle leather and premium horsehide holsters, belts, and accessories will need minimal care and maintenance throughout their service life.

Following the instructions below will add to the service life of your Galco product.

⚠ WARNING

KEEP YOUR FINGER OFF THE TRIGGER UNTIL YOUR SIGHTS ARE ON TARGET!

NOTICE

CARE, MAINTENANCE AND STORAGE

Dirt and grit trapped in your holster may harm your firearms's finish. To clean your holster, especially after use in dusty conditions, simply wipe out the interior of the holster using a clean, damp cloth.

Galco's Holster Care Kit includes everything needed to clean and maintain full-grain leather holsters and accessories. Includes Galco Leather Lotion, Draw-EZ, plus applicators and cleaning pads. Leather Lotion and Draw-EZ may be purchased separately.

Order online at galcogunleather.com,
by calling 800-874-2526, or at your local
Galco stocking dealer.

DO

Ensure that all screws are tightened snugly. Applying a small amount of clear nail polish to the threads will minimize screw back-out.

Full grain leather holsters that come in contact with bodily perspiration, the elements, or become soiled on a regular basis may need to be treated periodically to slow the natural breakdown of the leather fibers. Dry the leather naturally, without any type of artificial heat. Use Galco Leather Lotion, which will replace the natural oils in the leather

DON'T

Do not store your firearm in a holster if the holster is damp from perspiration or in otherwise moist condition.

Do not use LocTite® or threadlock. Outgassing from these adhesive compounds will adversely affect plastic, nylon and rubber holster parts.

Do not submerge or saturate your leather product in water or any other liquid or dry your leather product with heat from a hair dryer, oven, radiator, direct sunlight, etc.

Do not use products such as Neats Foot or Mink oil, as they will damage the leather. Additionally, do not use Galco Leather Lotion or other leather conditioners on Premium Center Cut Steerhide.

Do not leave your Galco product on the dashboard of your car in summer, or leave it otherwise exposed to the elements.

The above care and maintenance instructions cannot substitute for your good common sense. Following our recommended care and maintenance tips, along with common sense, will allow you to get the maximum service life from your Galco products.

HOLSTER FIT / BREAK-IN

Galco leather holsters are made of the finest materials and are precision molded to specific firearms. It may appear the holster fit is too tight at first, but this is by design. We engineer our holsters to fit tightly knowing the leather fibers will relax to the proper fit with use.

⚠ WARNING

UNLOAD YOUR FIREARM (chamber, magazine, cylinder) before testing holster fit.

If the holster has tension screws: Tension units are not pre-set at the factory. You may need to adjust them in order to holster your handgun the first time. We recommend that you check your tension screw adjustments before each use. There is no reason to completely remove tension units. Do not use LocTite® on tension units. However, a single drop of clear nail polish applied to your tension screw threads may reduce its unwanted loosening

HOLSTER FIT / BREAK-IN (continued)

If the fit is too tight when holstering your firearm the first time don't force it. If you do force the firearm into the holster, it may be very difficult to remove. Instead, follow these simple steps to break in your new holster using a process called blocking:

- 1 Place the unloaded firearm in a plastic freezer bag, or cover it in 2-3 layers of plastic kitchen wrap. Do not cover the grip.
- 2 Insert the bagged/wrapped firearm slowly into the holster, gently twisting it side-to-side to minimize tearing of the bag/wrap.
- 3 Once the firearm is completely seated in the holster, twist it approximately 1/16" in both directions 6-12 times.
- 4 Allow the bagged/wrapped firearm to sit in the holster for approximately 15 minutes.
- 5 Remove the firearm from the holster and remove the bag/wrap from the firearm.
- 6 Insert the unloaded firearm into the holster, which should now be snug but not loose. If it is still too tight, repeat the above steps until the holster is broken in to your satisfaction.

⚠ WARNING

If your holster has a retention strap: You may need to stretch the retention strap before you get it to snap. With your fingers only (no tools, no water, no chemicals, etc.)

- 1 Place your unloaded firearm in the holster.
- 2 Hold the firearm grip in your strong hand and the retention strap in your support hand.
- 3 Prepare the strap for stretching by grasping the snap and pulling the strap taut (remove the slack).
- 4 Twist the strap 90 degrees back and forth in a clockwise and counterclockwise rotation 10-12 times while keeping it taut.
- 5 Firmly push the firearm away from you while pulling on the strap and continue rotating the strap.
- 6 Release the tension for a moment and repeat two or three times.
- 7 Pull the strap over the back of the firearm without releasing tension.
- 8 While maintaining the strong tension attempt to snap the retention strap closed.
- 9 Repeat step five as needed.

Following and repeating the above instructions is the only way to an ideal break-in and long service life with proper fit that will last many years.

It is common for the inside of a leather holster to scratch from a single holstering (called etching). A smooth leather lined holster will be even more subject to this normal occurrence. After this initial etching, the holster will custom fit your firearm.

Try our Draw-Ez™ applied to the inside of your leather holster to shorten the break-in period and provide a slicker draw. Draw-Ez only treats the interior surface of the holster and will not be absorbed by the leather or harm the finish of your firearm.

REPAIRS

Galco uses only the highest quality materials. However, there maybe occasions when a repair is necessary. If you have an unaltered Galco product that needs repair, simply contact our Customer Service department at 800-874-2526 or customerservice@galcogunleather.com. We will issue you a Return Authorization (RA) number to print on the outside of your shipping container and provide you with detailed shipping instructions. We will make every effort to complete the necessary repair quickly and return your item to you promptly. If there is a charge for your repair, we will notify you before the work is performed.

TERMS OF SALE

Because we have no control over the use of our products, all Galco products are sold as is and “with all faults”. The entire risk as to the quality and performance of the product is with the buyer. Should the product prove defective following its purchase, the buyer and not the manufacturer, distributor, or retailer assumes the entire risk of all necessary servicing or repairs. Under no circumstances shall Galco be liable for incidental or consequential damages, such as loss of use of property, commercial loss and loss of earnings or profits. The implied warranties of merchantability and fitness for a particular purpose and all other warranties, expressed or implied, are excluded from this transaction and shall not apply to the product sold. The determination of the fitness or the suitability of any product for a specific use is the responsibility of the buyer. The illustrations shown herein are typical as to finish and application. Due to uncontrollable variances in color saturation, the actual product may differ slightly from that shown in our catalog/web site. Galco reserves the right to make changes in products built and/or sold by them at any time without incurring any obligation to make same or similar changes on products previously manufactured and/or sold by them. All Galco products are made in the U.S.A. and produced according to rigid specifications. Prices and models are subject to change without notice. Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so the above limitations and exclusions may not apply to you. Galco designs, features, and model names are the exclusive property of Galco International.
